About This Game

Buoyancy is a city-building strategy game set in an ocean world.

Build a floating city. Plan out your city's expansion by placing floating platforms that connect with each other. There are several types of buildings: Gatherers, Production, Hunters, Military, and Utility. Resources are delivered in real-time for constructing and production by your villagers.

Manage a growing population. Your city's population will be ever growing! Manage your villagers happiness and nourishment levels to keep them alive. Try to balance resource production with an increasing population that demands more and more. Combat sickness and fires that could cripple your city.

Explore with your mighty city. In this ocean world there are resources and floating junk to exploit but they're not always going to drift your way. You can move your city around to exploit resources providing your buildings a production boost. Most of these resources are critical to develop larger cities, and some are necessary to keep surviving! Find schools of fish, derelict ships, and take advantage of rebounded whale populations (or don't).

Fight for your survival. Pirates will attack you if they spot your city. You can train Guards to defend your city from invaders. Place Junk Cannons to destroy a large amount of pirates in one blow, but be careful of friendly fire!

Patch 1.8 Haptics:

We having been playing with the Haptics to give them a little more oompf!. **Yellow Turban Rebellion Dev Blog:**

The Yellow Turban Rebellion DLC pack is now available for purchase through Steam:

<https://store.steampowered.com/app/853360/>

But who were the Yellow Turbans, and what went into designing them for inclusion in Total War: THREE KINGDOMS? Get some insight into the process with lead designer Eva Jobse: <https://www.totalwar.com/blog/total-war-three-kingdoms-yellow-turban-rebellion-dev-blog/>. **A new minor patch is out! (0.1.1.2):**

This patch includes some QoL and new player improvements.

- Controls are now listed under the "Input" section of the options menu. This is currently just a quick reference as the keys are not customizable (yet)
- The game now offers helpful popup tips for mechanics that we've observed people struggling with or misunderstanding
- It is now possible to reload while squished up against a wall
- Loot scatters around randomly when enemies die, instead of piling up neatly
- Pickup/drop/use buttons in the inventory are now much bigger and easier to click quickly. **Official Splasher Goodies Shop !:** Hi !
